

# Step 5 - Building your Adapted Course

Please find listed below the recommended actions that you need to take during this step of implementation:

## Assess your Course

Decide on the 9 holes on your course that are most suitable for use during your Playing Events. You should consider design and difficulty of the holes as well as accessibility.

## Build your Academy Tee Course

In order to build the 5-stage teasing system, you need to build the Academy Tee first. Follow the steps below:

### Follow the Par 3, 4 and 5 Yardage Guidelines for the Academy Tee

For the Academy Tee you should be looking to use an official tee box on your course and the one you select the yardage of hole should be within the recommended yardage guidelines that is outlined in the Training Module.

### Build the Right Course Combination

Ideally we recommend your course consists of 5 Par 4's, 2 Par 5's and 2 Par 3 holes but this should be tailored to the ease of course access at your venue.

### Walk the Course and Mark the Teeing Positions on the Course Builder Map

You should walk the holes you have selected and use the Course Builder Map to mark the exact position of the tee markers for your event with the exact Academy Tee yardage of each hole. This can then be used to create your event scorecards and layout your tee markers on the event day.

### Mark the Teeing Position

Discuss with your venue management and green keeping staff if you can mark the teeing position with spray paint ready for your event or better yet consider adding a permanent marker.

## Build your Remaining 4 Teeing Positions

You are now ready to build the Birdie, Eagle, Albatross and Ace Teeing positions. These are based on a % calculation of the Academy Tee.

### Calculate the Yardages

The remaining four teeing positions are based on a % calculation of the Academy Tee length on each hole. Enter the yardage of the hole into the calculator on the Junior Playing Event page and log each recommend yardage on your Course Builder Map.

### Decide on the Exact Position of your Markers

Walk the holes you have selected and use the Course Builder Map to decide on the exact position of the remaining four testing positions. Note each of the exact yardages and positions on your Course Builder Map ready to build your scorecards during event week. You can also mark the teeing positions with spray paint ready for your event or better yet consider adding a permanent markers.
